

MAHMOUD MAGDY

MEP Technical Office Engineer | BIM Engineer
01284316187 | mahmoud.ibraheem456@gmail.com | Egypt

PROFESSIONAL SUMMARY

MEP Technical Office and BIM Engineer with 7+ years of experience delivering infrastructure, high-rise, industrial, and treatment plant projects. Experienced in technical office management, shop drawings, material submittals, RFIs, inspection requests, BIM coordination, clash detection, and consultant coordination. Advanced user of Revit MEP, Dynamo, Revit API (C#), and Python automation with a proven track record of developing tools that improve productivity, reduce manual effort, and enhance project delivery.

CORE COMPETENCIES

Technical Office Management • Shop Drawings • RFIs • Material Submittals • Inspection Requests • Consultant Coordination • BIM Coordination • Revit MEP • Navisworks • Autodesk Construction Cloud (ACC) • Clash Detection • Dynamo Automation • Revit API (C#) • Python • Firefighting Systems (NFPA) • Plumbing Systems (IPC) • BOQ & Quantity Surveying • QA/QC • Site Supervision

TECHNICAL SKILLS

Software: Revit, AutoCAD, Navisworks, BIM 360, Autodesk Construction Cloud (ACC), Microsoft Office
Programming & Automation: Dynamo (Advanced), Revit API C# (Advanced), Python (Intermediate)
Design Tools: HAP, Elite Fire, Hydraulic Calculations, Quantity Surveying

PROFESSIONAL EXPERIENCE

MEP Technical Office & BIM Engineer | A&M International | Nov 2025 – Present
Managed shop drawings, material submittals, inspection requests, RFIs, and consultant coordination for MEP packages.

Coordinated multidisciplinary Revit models and resolved clashes before construction.

Developed Dynamo automation tools for support placement, workset creation, batch link management, and plumbing pipe sizing.

Developed a Revit API (C#) add-in for NFPA-based firefighting pipe sizing, replacing manual calculation workflows.

Maintained technical document registers and tracked consultant comments.

MEP Technical Office & Site Engineer | Arab Contractors – High-Speed Rail Project | Jul 2024 – Nov 2025

Managed technical office activities for TSS, PP, and SP facilities.

Prepared and tracked IRs, RFIs, material submittals, and as-built documentation.

Reviewed multidisciplinary drawings and supervised site execution.

Prepared progress reports and handover packages.

MEP Technical Office Engineer | Arab Contractors – New Al-Alamein Towers | Apr 2023 – Jul 2024

Managed technical office deliverables for high-rise towers.

Coordinated MEP and civil disciplines and monitored approvals and project progress.

Managed document workflows using BIM 360 and ACC.

Operation & Maintenance Engineer | Arab Contractors – Bahr El-Baqar Treatment Plant | Oct 2021 – Mar 2023

Operated and maintained MEP systems and treatment plant equipment.

Monitored SCADA systems and coordinated preventive and corrective maintenance.

Prepared operational reports and supported performance optimization initiatives.

MEP Technical Office Engineer | Arab Contractors – Al-Kayan | Oct 2020 – Oct 2021

Prepared technical submissions, inspection requests, and consultant documentation.

Maintained drawing registers and coordinated approvals between site and technical office teams.

MEP Designer | ACE – Arab Consultant Engineers | Sep 2019 – Oct 2020

Designed firefighting and plumbing systems in accordance with NFPA and IPC standards.

Prepared drawings, BOQs, hydraulic calculations, and quantity take-offs.

Worked on major residential and institutional projects.

EDUCATION

Bachelor Degree of Mechanical Engineering – Mansoura University, Egypt (2014–2019)

LANGUAGES

Arabic (Native) | English (Intermediate)
